

# **Bidder Information Session February 26, 2025**

## **Auction Process for FirstEnergy's Pennsylvania Default Service Program DSP-VI**

**Auction Date: Monday, April 14, 2025**

**Delivery Periods Include: June 1, 2025 – May 31, 2027**

**Customer Classes: Residential, Commercial, and Industrial**

# Introduction

## Welcome to this bidder information session for FirstEnergy Pennsylvania Electric Company's Default Service Program

- Rate districts for FirstEnergy Electric Company (FEPA or Company): Metropolitan Edison (“Met-Ed”), Pennsylvania Electric (“Penelec”), Pennsylvania Power (“Penn Power”), and West Penn Power (“West Penn Power”, including service to Pennsylvania State University)
- The Company is seeking to procure full requirements Default Supply generation service for their Default Service Customers
  - Default Service = Load not being served by an Electric Generation Supplier (“EGS”)
  - Products in the auctions (customer class and delivery period):

Fixed-Price (FP) Auction		Hourly-Priced (HP) Auction	
Residential Class	Commercial Class	Industrial Class	
12-month: Jun 2025 – May 2026 24-month: Jun 2025 – May 2027	12-month: Jun 2025 – May 2026 24-month: Jun 2025 – May 2027	12-month: Jun 2025 – May 2026	

- Winning bidders will assume all responsibilities of a PJM Load Serving Entity (“LSE”), with the exception of certain solar AEPS requirements
- Date of Auction: Monday, April 14, 2025

## Presentation is being made by representatives from

- CRA International, the Independent Evaluator
- This presentation will be posted to the Auction Information Website

# Introduction

## Questions

---

**Two ways to submit questions during the presentation – questions will be answered only after the prepared presentation**

- Send an email to [fepaauction@crai.com](mailto:fepaauction@crai.com) or
- Use the Zoom Q&A feature to submit your questions
- Attendees will be able to see only their own questions submitted

### **Following the prepared presentation**

- Questions will be queued in the order above and answered
- The questions sent via email will be answered first, and the questions on Zoom Q&A will be answered next
- Attendees who use Q&A will remain anonymous during the Q&A session

The information and material provided on the Auction Information Website and filed with the PA PUC are controlling. Any conflict with the information conveyed during the bidder information session, or with information or material other than what is provided on the Auction Information Website, is unintentional.

Certain information may be subject to modification and approval by the PA PUC.

Neither the Company, nor the Independent Evaluator, either individually or as corporations, nor any of their representatives shall be liable to an interested party or any of its representatives for any consequences relating to or arising from the use of the information in this presentation.

# Introduction

## Background: DSP-VI

---

On December 14, 2021, Metropolitan Edison Company, Pennsylvania Electric Company, Pennsylvania Power Company, and West Penn Power Company filed a petition for approval of their DSP-VI Default Service Program with the Pennsylvania Public Utility Commission – Docket Nos. P-2021-3030012, P-2021-3030013, P-2021-3030014, and P-2021-3030021.

The Default Service Program was approved per the August 4, 2022 Pennsylvania Public Utility Commission Opinion and Order.

Under the Default Service Program DSP-VI, which covers the delivery period of June 1, 2023 through May 31, 2028, an auction process is used to procure full requirements Default Supply generation service for the Company's Default Service Customers.

On December 7, 2023, Pennsylvania Public Utility Commission approved a joint settlement related to the proposed consolidation of four Pennsylvania electric utilities – Metropolitan Edison Company (Met-Ed), Pennsylvania Electric Company (Penelec), Pennsylvania Power Company (Penn Power), and West Penn Power Company (West Penn Power) – into the FirstEnergy Pennsylvania Electric Company (FEPA).

- Ask – submit a question
- About – links to background information
- Registration – register to receive future notifications

# Product Overview

## DSP-VI Auction

---

**Products are distinguished by rate district, customer class, and period of delivery**

### **Rate districts**

- Met-Ed
- Penelec
- Penn Power
- West Penn Power (including service to Pennsylvania State University)

### **Products in the auctions (customer class and period of delivery)**

Fixed-Price Auction (Residential and Commercial products):

- Residential 12-month: June 2025 – May 2026
- Residential 24-month: June 2025 – May 2027
- Commercial 12-month: June 2025 – May 2026
- Commercial 24-month: June 2025 – May 2027

Hourly-Priced Auction (Industrial products):

- Industrial 12-month: June 2025 – May 2026

# Product Overview

## Price Paid for Winning Tranches

---

### Default Service Suppliers are paid the following

- For the Residential and Commercial products
  - Fixed-price component: 100% of the Supplier's delivered Default Service supply each hour multiplied by the DS fixed-price (determined in the auction)
- For the Industrial products
  - Fixed-price component: 100% of the Supplier's delivered Default Service supply each hour multiplied by the DS fixed price (determined in the auction), plus
  - Variable price component: 100% of the Supplier's delivered Default Service supply each hour multiplied by the DS "spot price", with the spot price equal to the sum of:
    - Real-time hourly total locational marginal price (LMP) for the district, plus
    - Fixed adder of \$4.00/MWh

# Product Overview

## DSP-VI Auction – Capacity Proxy Price

---

### Capacity Proxy Price (“CPP”)

- PJM is not expected to conduct a base residual auction for the 2026/2027 delivery year before the Company’s April 2025 DSP-VI auction
- For the 24-month product in the DSP-VI auction with the delivery period that will be covered by the yet-to-be conducted PJM capacity auction for delivery year 2026/2027, the CPP will be the average of the capacity prices from the last two capacity market auctions conducted by PJM (2024/2025 & 2025/2026)
- The 3<sup>rd</sup> Incremental Auction for the 2025/2026 delivery year tentatively is scheduled for February 26. Once results are published, bidders in the DSP-VI auction will be notified of an updated CPP for 2026/2027 energy delivery.
- For each billing month where a CPP is used, an additional line item on the supplier invoice will show the true-up amount expressed in dollars, which is the difference between the capacity price actually charged for load served on the day for the Company’s PJM zone and the CPP multiplied by the SSO Supplier Responsibility Share of the capacity obligation (UCAP) for each day of the billing month in question. True-ups will occur in the delivery year for which a proxy price was utilized.

# Product Overview

## Obligations of Default Service Suppliers

---

### **Obligations of Default Service Suppliers include the following:**

- Assume all responsibilities of a PJM Load Serving Entity ("LSE"), including all PJM administrative expenses and any other services or fees as required by PJM of an LSE
- Provide for energy
- Provide for capacity
- Provide for ancillary services
- Provide for transmission service, including Network Integration Transmission Service ("NITS")
- Provide certain alternative energy requirements (explained later)

### **Obligations of Default Service Suppliers exclude the following:**

- Regional Transmission Expansion Plan charges ("RTEP").
- PJM Expansion Cost Recovery charges ("ECRC").
- Reliability Must Run / Generation Deactivation charges ("RMR") associated with generating plants for which specific RMR charges began after July 24, 2014. All Suppliers will continue to be responsible for RMR charges associated with generating plants that began before July 24, 2014, as those charges may change over time.

# Product Overview

## Obligations of Default Service Suppliers (*continued*)

---

### **Under the DSP-VI Supplier Master Agreement, Default Service Suppliers will have the following alternative energy requirements**

- Alternative Energy Portfolio Standards Act (AEPS) Alternative Energy Credits (AECs) needed to meet the non-solar requirements of the Company's Default Service Load as more specifically described in the SMAs
- For the second to fourth years of the DSP-VI term, the SPAECs that the Company purchases through its solar PPAs will be allocated to Residential Default Service suppliers in proportion to the amount of residential load served over the course of the energy year
  - The Company will provide at least 32% of the SPAECs needed for the Residential Default Service Suppliers solar requirement. The allocated SPAECs may be greater than 32% based on the output from the solar project.
  - Commercial and Industrial Default Service Suppliers and EGSs are responsible for their solar requirement.

# Product Overview

## Obligations of Default Service Suppliers (*continued*)

---

### **Winning bidders will be responsible at their sole cost and expense for:**

- Any changes in PJM products and pricing during the contract term
- Any congestion costs incurred to supply its DS share
- Remaining a member in good standing of PJM

### **Each Default Service Supplier shall be responsible and liable to PJM for the performance of its LSE obligations associated with the provisions of Default Service Supply**

### **Default Service Load will be divided into identical units called tranches**

- Each tranche represents a defined percentage of the actual hourly energy required for the relevant delivery period as well as of the PJM capacity requirement for the relevant delivery period
- Intent is to procure 100% of the DS Load for each delivery period over multiple DS auctions

# Product Overview

## Tranches

---

For DSP-VI, Default Service Load will be divided into identical units called tranches, each representing a defined percentage of Default Service Load.

For example, if there are 25 tranches for a given customer class, then each tranche equals  $1/25 = 0.04 = 4\%$ , or four percent of that class's load. This includes four percent (4%) of the actual hourly energy required for Default Service Load for the relevant delivery period as well as four percent (4%) of the PJM capacity requirement for the relevant delivery period.

The nominal MW quantity associated with the energy and the capacity for each tranche will depend upon many factors, including but not limited to customer migration to alternative competitive suppliers and weather conditions.

Bidders are responsible for evaluating the uncertainty associated with supplying a wholesale energy tranche which could vary each hour.

# Product Overview

# Product Overview

## Minimum and Maximum Starting Prices

---

**Prior to the auction, the Independent Evaluator will announce a minimum and maximum starting price range for each auctioned product**

- As part of the application process, a Qualified Bidder submits an indicative offer based on the product-specific minimum and maximum starting prices which will be used to determine the Bidder's initial eligibility in each auction

**The Independent Evaluator may determine that due to extraordinary events, the minimum or maximum starting prices require revision**

- If indicative offers have already been received, the Independent Evaluator will request that the Registered Bidders (or the Qualified Bidders if the Part 2 Application process has not been completed) modify their indicative offers on the basis of the revised minimum starting prices and the revised maximum starting prices
- Such an event also may require a revision to the schedule for the Default Service Program

**No later than three (3) business days before bidding starts, the Independent Evaluator will inform Registered Bidders of the starting prices for round 1**

# Qualification Process

## Overview

---

### **Part 1 Applications: Prospective bidders apply to become Qualified Bidders**

- Start Date: Thursday, February 27, 2025
- Due Date: Wednesday, March 12, 2025 at 12:00 noon ET

### **Part 2 Applications: Each Qualified Bidder provides certifications, its indicative offer, and pre-bid security in order to become a Registered Bidder**

- Start Date: Wednesday, March 19, 2025
- Due Date: Tuesday, April 1, 2025 at 12:00 noon ET

### **Only Registered Bidders can participate in the bidding**

**Prospective bidders will be able to fill out, submit, and upload their supporting documentation for the Part 1 and Part 2 Applications online through the secure Online Application process**

# Qualification Process

## Account Request Form

---

In order to get an Online Account to participate in the Part 1 and Part 2 Application process, prospective bidders must fill out an Account Request Form and email it to [fepaauction@crai.com](mailto:fepaauction@crai.com)

Account Request Form – shown on the next slide – is available on the Home page of the Information Website ([www.fepaauction.com](http://www.fepaauction.com)) under “Forms”

Email the completed Account Request Form to [fepaauction@crai.com](mailto:fepaauction@crai.com)

# Qualification Process

## Account Request Form *(continued)*

FirstEnergy's Pennsylvania Default Service Program Auction Process

### **Account Request Form: Request for Part 1 and Part 2 Application Online Account**

With access to an Online Account for the Part 1 Application and Part 2 Application process, a prospective bidder will be able to submit and check the status of their Part 1 Application and Part 2 Application as well as upload supporting documentation.

To open an Online Account please fill in the following information:

**Company Name:**

**Date:**

MM/DD/YYYY

Please provide the First Name, Last Name, and E-mail Address for every person that you request to be given access to your online Application. Each person listed below will receive a unique username and password combination that they will be able to use to login to the online application of the Company named above.

\*\*\*Please email this form to the Independent Evaluator at [fepaauction@crai.com](mailto:fepaauction@crai.com)

# Qualification Process

Part 1 Application – Due Wednesday, March 12, 2025 at 12:00 noon ET

---

**Submit an application from a person with the power to bind the bidder and agree to:**

- Comply with all rules of the auction(s)
- If they become winning bidders, execute the Supplier Master Agreement with the Company

**Show that they either satisfy the three requirements below, or have no existing impediments to them satisfying all the requirements by the start of the supply period**

- Transmission Customer of PJM and have executed the relevant PJM Agreements
- Have PJM E-Accounts necessary to provide Default Service Supply
- PJM Market Participant and a Load Serving Entity in PJM

**Agree that if they become winning bidders, they will comply with the creditworthiness requirements set forth in the Supplier Master Agreement**

**Certify that if they qualify to participate, they will not:**

- Disclose information regarding the list of Qualified Bidders
- Disclose confidential information about Qualified Bidders obtained during the bidding process
- Substitute another entity in their place
- Transfer their rights to another entity
- Otherwise assign their status as Qualified Bidders to another entity

# Qualification Process

## Part 1 Application *(continued)*

---

**A prospective bidder that has qualified during the Part 1 Application process becomes a Qualified Bidder**

**Independent Evaluator will send a list of all Qualified Bidders to relevant parties that have undertaken to maintain the confidentiality of the list of Qualified Bidders – relevant parties that will receive this list of Qualified Bidders are:**

- Each Qualified Bidder
- Representatives from the Company

**All parties receiving a list of Qualified Bidders will be subject to the confidentiality requirements as specified in the Bidding Rules**

**Part 1 Applicant also must submit financial information and may choose to submit a Draft Pre-Bid Letter of Credit (described later)**

**Prospective bidders will be notified by the Independent Evaluator no later than three (3) business days after the Part 1 Application Due Date whether they succeeded in becoming a Qualified Bidder**

# Qualification Process

## Part 1 Application (*continued*)

---

### **Part 1 Applications are submitted online**

- The Part 1 Online Application process opens on Thursday, February 27, 2025
- Due Date: Wednesday, March 12, 2025 at 12:00 noon ET

### **A prospective bidder is required to:**

- Submit a Part 1 Application to participate in FirstEnergy's Pennsylvania Default Service Program auction(s)

**All prospective bidders for the DSP-VI April 2025 auctions must complete a new Part 1 Application to become a Qualified Bidder for the DSP-VI auction process**

# Qualification Process

Part 2 Application – Due Tuesday, April 1, 2025

---

**Qualified Bidders from the Part 1 Application process submit Part 2 Applications to become Registered Bidders**

**The Part 2 Application process opens on Wednesday, March 19, 2025**

**Due Date: Tuesday, April 1, 2025 at 12:00 noon ET**

**In the Part 2 Application, each Qualified Bidder will make a number of certifications regarding associations to ensure that they are participating independently of other Qualified Bidders and to ensure the confidentiality of information regarding the auction(s)**

**A Qualified Bidder is associated with another Qualified Bidder if the two bidders have ties that could allow them to act in concert or that could prevent them from competing actively against each other**

# Qualification Process

## Part 2 Application *(continued)*

**With its Part 2 Application, a Qualified Bidder will be required to submit an indicative offer – comprising a set of two (2) numbers of tranches for each product in an auction – and to post pre-bid security sufficient for this indicative offer**

- For each product, the first number is the number of tranches that the Qualified Bidder is willing to serve at the minimum starting price for the product in the auction(s)
- For each product, the second number is the number of tranches that the Qualified Bidder is willing to serve at the maximum starting price for the product in the auction(s)
- At the minimum and the maximum starting prices, the number of tranches across all products indicated by the Qualified Bidder cannot exceed the Qualified Bidder's load tranche cap (described later)

### **Bidder's initial eligibility**

- This is the maximum total number of tranches the Qualified Bidder can bid across all products in round 1 of each auction and may be subject to a load cap
- Determined by the number of tranches in the Qualified Bidder's indicative offer at the maximum starting prices
- Thus, the indicative offer at the maximum starting prices needs to state the maximum possible number of tranches that the bidder would be ready, willing, and able to serve

**Qualified Bidders will be notified by the Independent Evaluator no later than three (3) business days after the Part 2 Application Due Date whether they succeeded in becoming a Registered Bidder**

# Credit Provisions

## Required Credit and Financial Information

---

### For bidder or bidder's Guarantor:

- **Financial statements** (most recently issued SEC Form 10-K, 10-Q, 8-K)
- **A statement of rulings or judgments** relating to financial status that have had a material impact on financial status
- **Debt ratings** from at least **one** of the following rating agencies: S&P, Fitch, or Moody's (with supporting documentation)
- **Contact information** for the Bidder's/Guarantor's credit representative to answer questions on the documentation provided

# Credit Provisions

## Pre-Bid Security – 2 Options

---

### 1) Use Pre-Bid Letter of Credit

- Part 1: Submit a Draft Pre-Bid Letter of Credit (LOC) (optional)
- Part 2: Submit an executed Pre-Bid LOC (**\$500,000**/tranche)

### 2) Make a cash deposit

- Part 1: Request wiring instructions
- Part 2: Submit cash deposit (**\$500,000**/tranche)
  - Attach a copy of the W9 (tax ID) form and a copy of banking information on company's letterhead, signed and dated
  - Provide wiring instructions for returning your cash deposit

# Credit Provisions

## Supplier Master Agreement – Key Elements of Credit Provisions

---

**Security posted during the term of the Default Supply delivery period will depend upon a creditworthiness evaluation**

- Unsecured credit may be granted based on the Supplier's (or its Guarantor's) Tangible Net Worth and credit rating (see Section 6.6 and Appendix A of the DSP-VI Supplier Master Agreement)
- Total Exposure Amount less any unsecured credit (Margin) must be met with cash or Letter of Credit (Appendix F of the DSP-VI Supplier Master Agreement)

**The credit exposure methodology is explained in Section 6.5 of the DSP-VI Supplier Master Agreement**

**Letter of Credit (Appendix F of the DSP-VI Supplier Master Agreement)**

**Guaranty (Appendix G of the DSP-VI Supplier Master Agreement)**

# Information Website

---

Information Website for the Default Service Program auction process is [www.fepaauction.com](http://www.fepaauction.com)

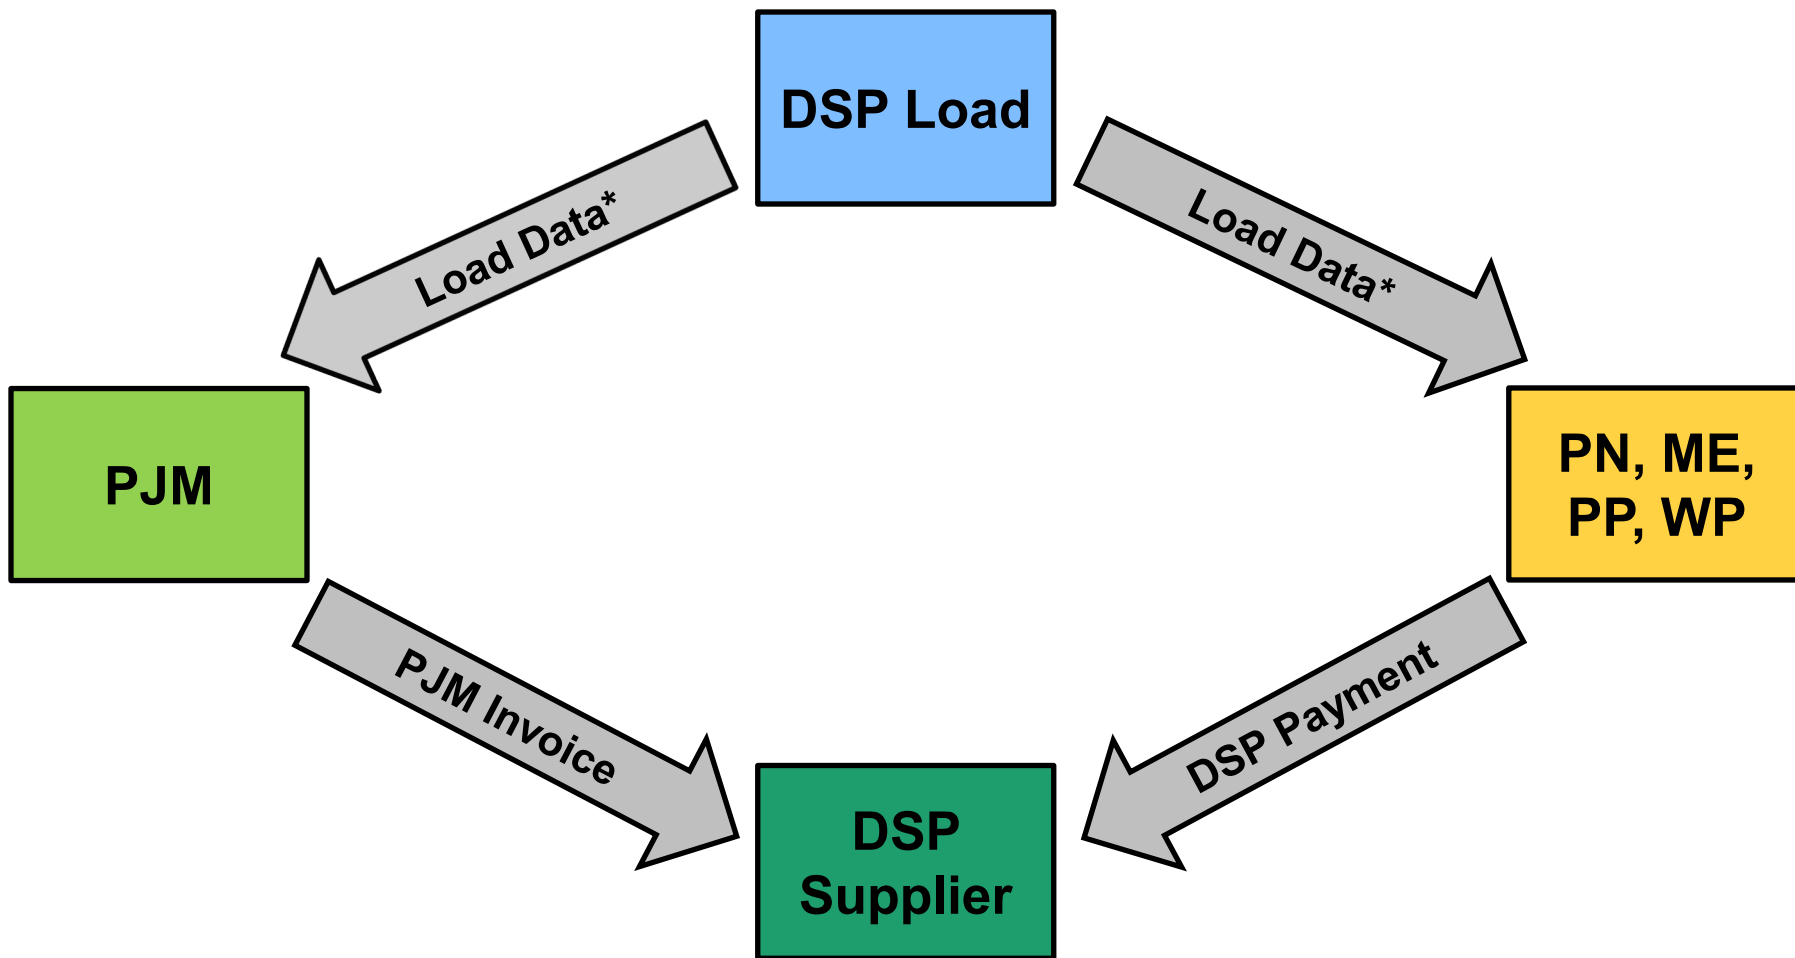

- Information about the Default Service Program
- Download Supplier documents (Supplier Master Agreement, Bidding Rules, etc.)
- Download load and other data
- Auction calendar
- Results from previous auctions under the current Default Service Program
- News and announcements
- Frequently Asked Questions (FAQs)
- Register to receive updates
- Submit questions
- Information about FirstEnergy, CRA International, PJM

## Register on the Information Website

- Register to receive information updates regarding Default Service Program – provide name, company name, valid email address
- Once registered, prospective bidders can submit questions

# PJM Settlement

## Settlement Landscape

\* Load data are developed by the Meter Data Coordinator as designated on the Market Participant's application. The Meter Data Coordinator uses the same PJM settlement data to calculate the Default Service Invoice as well as to submit the settlement data to PJM.

# PJM Settlement

## The Role of RTO Operations Settlements at FirstEnergy Pennsylvania

---

### **Acts as the Meter Data Coordinator for Default Service Suppliers**

- Submits load data to PJM for generation of invoices
  - Primary and Secondary data
  - Re-Settlement periods as necessary
- Default Service Load split by tranches won in delivery period

### **Uses PJM settlement load data to develop the Default Service Invoices**

- Primary and Secondary data are used for Final Monthly Energy Allocation (FMEA) and Preliminary Monthly Energy Allocation (PMEA)
- Spreadsheet format
- Emailed
- Based on tranches awarded in the Default Service procurement process

**Dave Woomer**

[dwoomer@firstenergycorp.com](mailto:dwoomer@firstenergycorp.com)

610.921.6312

# Bidding Format

## Reservation Price and Starting Price

---

### **There is a reservation price for each product**

- No tranche for a product will be procured at a price that is above the reservation price for the product
- Reservation prices will not be disclosed to bidders

### **Starting price for each product = announced price for round 1**

- Announced no later than three (3) business days before bidding starts
- No lower than the product's minimum starting price; no higher than its maximum starting price
- Starting price  $\geq$  reservation price

# Bidding Format

## Discretion to Reduce Tranche Targets

---

### Discretion to reduce tranche targets (# tranches to procure)

- If there is insufficient supply bid for the tranches to ensure competitive bidding, Independent Evaluator may reduce the tranche targets
  - The criteria that could lead to such a reduction will be determined prior to the auction(s) but will not be announced
  - Once certain pre-specified criteria related to excess supply and related to the reservation prices have been met, the discretion to reduce the tranche targets will be eliminated and there will be no reduction in the tranche targets
  - Any exercise of this discretion would be more likely in the earlier rounds of the auction(s)
- If the Independent Evaluator reduces the tranche target(s), bidders will be informed of the revised tranche target(s)

# Bidding Format

## Bidder's Eligibility and Load Cap

### Bidder's eligibility

- This is the maximum number of tranches the bidder can bid in a round
- Bidder's eligibility for a round = total number of tranches they bid in the preceding round
- Thus, bidder's eligibility cannot increase during auction(s) – only stays the same or declines

**The load cap limits the bidder's initial eligibility – i.e., maximum number of tranches the Qualified Bidder is allowed to bid on in round 1 across all products**

**Load cap is a % of load aggregated across all products in each auction**

	<b>DSP-VI Residential/Commercial Auction</b>	<b>DSP-VI Industrial Auction</b>
Commission-Ordered Load Cap %	50	75
Tranche Target	54	32
Load Cap	27	24

- No bidder may bid on and win more tranches than the load cap – enforced by ensuring that each bidder's initial eligibility does not exceed the load cap in the auction

# Bidding Format

## Clock Format

---

### Bidders bid using the Independent Evaluator's Bidding Website

#### Multiple-round, multiple-product, descending-price clock format

- Each round has specified start and end times
- For each product, the price for the next round is announced (“announced price”) – price falls round to round
- Round opens and each bidder submits the number of tranches of each product it is willing to supply at the product's announced price
- Round closes
  - **If the total number of tranches bid > tranche target for any product**, then announced price for that product will be reduced for the next round by a price decrement
  - **If the total number of tranches bid  $\leq$  tranche target for any product**, then the announced price for that product will remain unchanged for the next round
- Round results are reported prior to the start of next round

# Bidding Format

## Default Bid

---

### Default bid for a bidder

- If bidder entered round with positive eligibility but fails to submit a confirmed bid in the round, then default bid will be submitted on behalf of the bidder
  - **Products for which the announced price decreased from the preceding round** – the default bid will equal zero (0) tranches
  - **Products for which the announced price did not decrease from the preceding round** – the default bid will equal the accepted number of tranches from the preceding round
- A bidder with zero (0) tranches across all products – i.e., zero eligibility – in an auction will not be able to submit any more bids in that auction

# Bidding Format

## Subscription State = Measurement of Excess Supply

---

**At the end of each round, a product is over-subscribed (excess supply > 0), subscribed (excess supply = 0), or under-subscribed (excess supply < 0)**

**Excess supply = # of tranches bid – tranche target**

- 1) If excess supply > 0:** Price for the product is reduced by a price decrement and the auction will continue with the next round.
- 2) If excess supply = 0:** Price for the product will remain unchanged. Bidders who bid on the product will not be able to reduce their tranches bid on the product in the next round of the auction.
- 3) If excess supply < 0 and no bidders reduced the number of tranches they bid on the product:** Price for the product will remain unchanged. Bidders who bid on the product will not be able to reduce their tranches bid on the product in the next round of the auction.
- 4) If excess supply < 0 and one or more bidders reduced the number of tranches they bid on the product:** Consequences are the same as case #3, and also a rollback will be applied to the product.

# Bidding Format

## Rollback

---

**When there is excess supply for a product at the end of round R, the announced price will decline for the round R+1**

- In round R+1, bidders are free to reduce the tranches bid for the product either by switching tranches from the product to another product, and/or by reducing the total tranches bid across all products
- Products that were over-subscribed in round R and that are under-subscribed in round R+1 (excess supply < 0) are subject to a rollback following round R+1

**The rollback process following round R+1 retains sufficient number of tranches that were bid on the product in round R such that excess supply for the product following round R+1 equals zero**

- Tranches rolled back are selected at random from the tranches reduced or switched from round R to round R+1
- The price associated with rolled back tranches is the round R price (the price at which the tranches were bid) – i.e., a price higher than the round R+1 price
- Only tranches that were both bid on a product in round R and not bid on the product in round R+1 are subject to a possible rollback
- Even after a rollback, the total number of tranches accepted for a bidder across all products will be no greater than the total number of tranches the bidder bid in round R

# Bidding Format

## Illustrative Example – Single Product

Illustrative Bidding in an Auction (single-product example)							
Round	Tranche Target	Announced Price (\$/MWh)	Number of Tranches Bid				Total
			BidderA	BidderB	BidderC	BidderD	
1	100	\$75.00	34	55	21	72	182
2	100	\$70.00	30	55	15	50	150
3	100	\$66.00	20	52	10	45	127
4	100	\$62.00	15	48	0	44	107
5	100	\$59.50	0	48	—	42	90

The auction will conclude after round 5 because excess supply for the product was no longer positive. In the round, only 90 tranches of supply were bid against 100 tranches being procured. Negative excess supply triggers a rollback of 10 tranches.

**BidderA** bid 15 tranches at \$62.00/MWh in round 4 and 0 tranches at \$59.50/MWh in round 5. Because BidderA reduced its bid, it is subject to a rollback of up to 10 tranches.

**BidderB** bid 48 tranches in rounds 4 and 5. Because BidderB did not reduce, it is not subject to a rollback. BidderB wins 48 tranches at the clearing price.

**BidderC** bid 0 tranches at \$62.00/MWh in round 4 and is not subject to any rollback.

**BidderD** bid 44 tranches at \$62.00/MWh in round 4 and 42 tranches at \$59.50/MWh in round 5. BidderD is subject to a rollback of up to 2 tranches.

Rollback Results				
		Tranches		
Round	Price (\$/MWh)	BidderA	BidderB	BidderD
4	\$62.00	15	48	44
5	\$59.50	0	48	42
Rollback	\$62.00	9	0	1
<b>Winning</b>	<b>\$62.00</b>	<b>9</b>	<b>48</b>	<b>43</b>
<b>Clearing price for all 100 tranches won = \$62.00</b>				

# Bidding Format

## Winning Tranches, Bidders, and Prices

---

### **If Excess Supply = 0 for all products at end of a round**

- Winning tranches are the tranches bid in the last round of each auction
- Winning bidders are the bidders who bid those tranches
- Uniform pricing: Price to be paid for winning tranches for a product will be the highest price for any tranche in the product's bid stack

### **If Excess Supply $\leq 0$ for all products at the end of a round**

- There will be a rollback for all products with excess supply  $< 0$
- There will be no rollback for products with excess supply  $= 0$
- Uniform pricing: Price to be paid for winning tranches for a product will be the highest price for any tranche in the product's bid stack

### **Note: In all cases, a product's bid stack has at most two prices**

- If the bid stack has rolled-back tranches, then there are two prices in the bid stack – the most recent (i.e., lower) announced price and the next-most recent (i.e., higher) announced price
- If the bid stack does not have rolled-back tranches, then there is only one price in the bid stack – the most recent announced price

# Bidding Format

## Close of the Auction

---

### **Shortly after the last round of each auction, results are determined by the Independent Evaluator, then:**

- Independent Evaluator provides to the Company and the Commission the identity of winning bidders, the number of tranches won by each winning bidder, and the prices for the tranches won
- Independent Evaluator notifies:
  - Each winning bidder of how many tranches the bidder has won and at what prices
  - Each unsuccessful bidder that the bidder has not won any tranches
- The Commission will have 48 hours after the conclusion of the auction to determine if there has been a violation of the auction rules in such a manner as to invalidate the auction(s) based upon an assessment from the Independent Evaluator

### **The Company and winning bidders will execute the Supplier Master Agreement(s)**

# Bidding Format

## Contingency Plan

---

### Contingency Plan for the Default Service procurement auctions

- See Section 10 of the DSP-VI Bidding Rules
  - At least one of the products in an auction is not fully subscribed
  - At least one of the winning suppliers defaults prior to the start of the delivery period or at any time during the delivery period

# Bidding Format

## Technical Difficulties During an Auction

---

- Unforeseen technical difficulties may happen during an online auction
- Pursuant to the auction rules, if a technical difficulty occurs during the auctions, depending on the circumstances the Independent Evaluator will:
  - Inform all the bidders as soon as possible, by phone and/or Independent Evaluator Message page on the Bidding Website
  - Accept bids over the phone to the Help Desk
  - Accept bids using the Backup Bidding Fax Number
  - Extend the duration of bidding round(s), extend the time between bidding round(s), or otherwise pause the auction

# New FirstEnergy Office Location – Effective April 1, 2025

---

- Starting April 1, 2025, FirstEnergy will operate from the following new address:
  - 341 White Pond Drive  
Akron, OH 44320  
Mailstop: FEHQ-C1

# Timeline for Upcoming Auctions

## Timeline for April 2025 DSP-VI Auctions

Activity	Date
Zoom Information Session	Wednesday, February 26, 2025
Part 1 Applications can be submitted	Thursday, February 27, 2025
CRA announces tranche targets and tranche sizes (% and MW)	Thursday, February 27, 2025
Deadline to submit Part 1 Applications	Wednesday, March 12, 2025
CRA announces minimum and maximum starting prices	Wednesday, March 19, 2025
Part 2 Applications can be submitted	Wednesday, March 19, 2025
CRA announces any update to the tranche sizes (MW)	Thursday, March 27, 2025
Deadline to submit Part 2 Applications	Tuesday, April 1, 2025
Bidder User Manuals Distributed	Friday, April 4, 2025
Mock Auction for Registered Bidders	Wednesday, April 9, 2025
CRA announces starting prices to Registered Bidders	Wednesday, April 9, 2025
<b>Auction for Registered Bidders</b>	<b>Monday, April 14, 2025</b>
Commission Decision due second day after conclusion of auction (tentative)	Wednesday, April 16, 2025
Supplier Master Agreement Signed (tentative)	Friday, April 18, 2025
Power Flow	Sunday, June 1, 2025

# Q&As

Please do NOT identify yourself if you have a question

---

## Following the prepared presentation

- Questions received and queued during the prepared presentation will be answered in the following order:
  - Email
  - Zoom Q&A
- The questions sent via email will be answered first, and the questions on Zoom Q&A will be answered next
- Attendees who use Q&A will remain anonymous during the Q&A session

**Q&As raised during this bidder information session will be posted on the Information Website**

*Thank you for your interest in FirstEnergy's Pennsylvania Default Service Program*
